* Days = Days from planting until mature fruits

** D-Determinate (Fixed size, produces crop all at same time, good for container or small areas)

I- Indeterminate (Continues growing and producing all summer, needs staking or caging)

Basic Planting Instructions:

- 1) Don't plant outside until mid-May to prevent frost damage.
- 2) Pinch off leaves on bottom half of stem before transplanting.
- 3) Bury up to one half of stem underground to help rooting.
- 4) Stake or cage as necessary to prevent plant from falling over.

Master Gardener Website:

www.mgfk.org

Heirloom Definition: Open pollinated variety in circulation for at least 50 years.
